Toronto ER Doctor's Personal Testimony

My name is Mark Trozzi. I am a medical doctor; I graduated in 1990 from The University of Western Ontario. I have been practicing Emergency Medicine for the past twenty-five years, and am a veteran critical resuscitation instructor. I was on call in multiple emergency units since the onset of the so-called "pandemic", until February 2021, including one ER designated specifically for COVID-19.

What follows is my observations and opinions; I am bound by my personal and religious convictions to speak openly and honestly. I do not have authority to tell you "the truth", but I will share my honest experiences, perceptions, and digests of hundreds of hours of research on the subject of covid-19.

At the onset of this "pandemic", I was cautious, and hence meticulous, with N95 mask use, hand washing, social isolation and distancing etc. I studied coronavirus science and was deeply involved in many emergency department drills to modify our practice in profound ways to deal with the "killer virus" we were advertised. However, various things soon made me consider that we were being deceived and manipulated. Here are a few

The First Wave

The "first wave" of the "pandemic" was absolutely the quietest time in my career. I have worked very hard and been very busy over the past twenty-five years in ER. However, both in my regular ER and my "COVID-19 designated" ER, there were almost no patients, and almost no work. I had multiple, long ER shifts without a single patient. Meanwhile, when I would go to the local grocery store, the propagandized public, God bless them, would usher me to the front of the antisocial distance line, thanking me for everything I was going through as a front-line emergency doctor. They believed that the ER's and hospitals were full of patients dying from covid, and that I must be exhausted and at risk of dying myself from exposure. I began contacting doctors and friends all over Canada and the US, and found the same pattern: empty hospitals, and propaganda saying that they were full of patients dying of covid.

Early Investigation

Early in my studies, I investigated zinc and hydroxy-chloroquine, which based on sound physiology, may genuinely help those rare persons who get very sick with this cold virus. I was surprised that this treatment was simply brushed aside and dismissed by most of the medical community.

Early Concerns

Researching the World Health Organization, of the UN, I learned that the Chinese dictatorship (PRC) had propped up communist and disreputable "Dr" Tedros, as the head of the WHO. I learned how the PRC had been involved in: the virus release; the cover up for weeks; the disappearing and suppression of honest Chinese doctors and scientist; the spreading of the virus to the world (sparing Beijing where the PRC elite live); and dramatic abuse of the Chinese people in their well-timed lockdown, which was filmed and transmitted to the world to create the panic that herded all of us into surrendering our economies and civil rights.

Foxes Guarding the Henhouse

I learned how Canada's chief public health officer Dr Tam, is also on the oversight committee of the WHO with Dr Tedros making her, I think, a double agent. I have

listened to her often-bizarre dissertations to Canadians regarding covid-19.

My Perception of the Situation

I perceive that at every level, hospital administration has had no apparent choice, other than to submit to the

endless top-down roll out from governments, of questionable new rules, protocols, and procedures. My honest conversations with co-workers about my research and observations, became a problem. Caught in this quandary, an important administrator who I greatly respect, told me that "my thoughts made others uncomfortable, and made it difficult to keep everyone motivated and compliant" with all the new protocols and restrictions. Sympathetic to the sad situation, I maintained my clinical position by promising to "bite my tongue any time I thought I was going to speak about COVID-19" in the hospital. This was ultimately ethically impossible for me, and by mid-November I began winding down my ER work, and resigned from all my ER's by mid-February, to avoid conflicts between my social, legal, and ethical responsibilities; and the hospitals which I am fond of.

Have I Ever Seen a Covid-19 Patient?

In my emergency department work, I have never seen a patient sick with COVID-19; I have seen some positive PCR tests in asymptomatic people, and watched people be imprisoned in their own homes and isolated from family and friends. My research into the PCR test has convinced me personally that it is misleading, manipulatable, and being used to drain endless taxpayer's money and future debt, to dramatically enrich the very criminals running this scandal. My province alone has performed ~50,000 PCR tests daily. Meanwhile our federal government is bringing in hundreds of thousands of doses of potentially dangerous experimental injections of modified viral genetic material, calling them "vaccines", and having the military manage them. Is this reasonable for a predominantly mild and non-fatal viral illness?

Information Suppression?

I have watched the suppression of doctors and scientists who performed serum antibody studies, whose findings showed that the virus was much more widespread, yet generally nonfatal, and asymptomatic or very mild in most cases; and that in many regions we had likely already achieved natural herd immunity by summer 2020.

Look at this study performed in Wuhan itself, which shows that the virus was done there by June 1, 2020 just two months after their brief lockdowns ended, and no one was spreading it, not even the very few people with a positive PCR "test" (and they were not sick):

<https://www.nature.com/articles/s41467-020-19802-w>

China

I noticed that after China's theatric lockdown, they quickly went back to business as usual, while all our economies were frozen; they gained tremendous control over the world's marketplace. It seems a great, though evil, strategy!

Political Manipulation of Health Care Workers

I perceive that many things we learned in medical school about infectious disease have been brushed aside and replaced by constantly expanding lists of — to-me-often-strange — mandates by public health officials. Doctors, nurses, and teachers are especially important to the success of this COVID-19 deception, as we are leaders in society and people trust our advice. So, it is no surprise that I have found free speech and thought have been very suppressed in our ranks. Rather than endure the punishments of dissenting, we can choose to experience the short-sighted perks like extremely quiet days in the ER, replacing our traditional hands-on work with Zoom sessions from home and accessing a variety of new COVID-19 billing codes. At one point, I was offered a position making more money than I normally make working in a busy ER, to just stay home and be available in case the covid swabbing nurse needed to video conference with me.

There are many positive and negative motivators being used to manipulate Canadian doctors, nurses and teachers, to inadvertently participate in this grand covid deception; but this is destroying our society. To use a Titanic metaphor: "even the luxury suites on the Titanic end up at the bottom of the ocean when she sinks". Also, much of what is being done, including the experimental viral genetic injections, seem to violate the Nuremberg code regarding medical experimentation with full informed consent by the participants.

Doctors and nurses face tough decisions. My career as an emergency physician had always provided me an opportunity to practice my religious and ethical beliefs of honesty and kindness, while making a good living. Now maintaining the career I love would require participating in the deception, violating my oath and spiritual beliefs, and in my opinion committing crimes against humanity as defined by the Nuremberg Code.

I empathize with all my fellow doctors and nurses. We are all victims of the covid abuse.

Deeper Investigation

I researched and perceived how corrupt oligarchs seem to have planned this crime against humanity. This planning included Event 201 which was a simulation of a corona pandemic conducted by the Bill & Melinda Gates Foundation, the World Economic Forum and Johns Hopkins University in October 2019; and the Rockefeller Foundation's 2010 Viral outbreak simulation planning called "Operation Lockstep". Both these projects described how a viral outbreak would be used to bring in an authoritarian system with the loss of our human rights and freedoms. I also observed how their cohorts in big tech like Google, Facebook, Twitter and YouTube worked

VACCINE CASUALTIES: Is The CDC Hiding The Real Numbers?

By Tea Lynn Moore and Dale Hawkins

As of May 14, 2021, in the US, **227,805 COVID vaccine adverse events, 12,625 COVID vaccine hospitalizations, and 4,201 COVID vaccine deaths have been reported to VAERS...** but the true number may be magnitudes higher.

The Vaccine Adverse Events Reporting System (VAERS) is the post-marketing surveillance system the FDA asks healthcare professionals to report adverse vaccine events to. The system is passive, meaning: when a healthcare professional recognizes a connection between an adverse event and a vaccine, the report is only made when they choose to take the time out of their day to record it.

In 2010, Harvard Medical School was granted \$1 million by the US Department of Health and Human Services to investigate VAERS to see how efficient it is and to create a new automated monitoring system. They analyzed data by creating an automated system within their own Harvard Medical System. Their report, titled: *Electronic Support for Public Health – Vaccine Adverse Event Reporting System* found that **“fewer than 1% of vaccine adverse events are reported to VAERS.”**

As brilliantly efficient as Harvard’s newly created automated system was, it was never adopted by the country as planned. As Harvard stated in their final report, *“Unfortunately, there was never an opportunity to perform system performance assessments because the necessary CDC contacts were no longer available and the CDC consultants responsible for receiving data were no longer responsive to our multiple requests to proceed with testing and evaluation.”* So basically, upon learning of how few adverse vaccine reactions were actually reported to VAERS, the CDC (whose job it is to monitor disease and adverse reactions) chose not to accept a solution to the under-reporting problem.

Ten years later, despite the US government promising they would have a better safety monitoring system (known as BEST) up and running time for the COVID jab (it’s still in the “developmental stages”), the problem of fewer than 1% of adverse vaccine events being reported persists.

According to VAERS, there’s only 4.7 cases of anaphylaxis per million doses of the Pfizer vaccine and 2.5 cases of anaphylaxis per million doses of the Moderna vaccine. But an article in JAMA found a wildly different result. The article, titled *Acute Allergic Reactions to mRNA COVID-19 Vaccines*, studied Mass General Brigham employees who received their first dose of an mRNA COVID-19 vaccine (half received Pfizer and half received Moderna). Of the 52,805 participant employees who received their COVID-19 vaccine, they found that “98% did not have any symptoms of an allergic reaction after receiving an mRNA vaccine. The remaining 2% reported some allergic symptoms” however, severe reactions consistent with anaphylaxis occurred at a rate of 250 per million -100 times the VAERS rate!

So, now it appears VAERS only catches roughly 1% of anaphylactic reactions to the COVID mRNA vaccines -despite the fact that anaphylaxis is a reaction that is quite easy to spot (since the symptoms are severe) and easy to link to the vaccine (since symptoms typically arise within 30 minutes of the jab). The blood clotting disorder linked to the AstraZeneca vaccine, known as VITT, is also quite easy to catch since the condition does not occur naturally (previously the condition was only seen in gene therapies and as a reaction to certain medications). But what about complications that are less easy to spot? Heart inflammation, dementia, and infertility are all conditions that some experts suspect a COVID-19 vaccine may trigger. The slow onset of some conditions, along with the passive reporting system currently in place, may mean these complications won’t come to light in time.

Not only does the CDC seem uninterested in uncovering the true number of adverse vaccine reactions, the CDC also appears to have little interest in learning of the true effectiveness of the vaccine.

The CDC has been recording “breakthrough infections,” which are cases where a person tests positive for SARS-Cov-2 ≥14 days after they have completed all recommended doses of a COVID-19 vaccine. According to the CDC, the data is recorded to “help identify patterns and look for signals among vaccine breakthrough cases.”

For a long time, we’ve known that actual vaccine breakthrough numbers are likely higher than reported, as the surveillance system is passive and relies on voluntary reporting from state health departments, and may not be complete. In addition, some breakthrough cases will not be identified due to lack of testing (since most people don’t continue getting tested after they’ve been vaccinated). But recently, the “breakthrough” infection” numbers have been under-documented for an all-new reason.

Effective May 14, 2021, the **CDC announced** a change to their criteria in reporting breakthrough cases. According to a statement on the CDC’s website, the agency said to help “maximize the quality of the data collected on cases of greatest clinical and public health importance” **it will stop recording COVID breakthrough infections unless they result in hospitalization or death (whereas unvaccinated individuals who test positive for COVID-19 still count as a “case” even if they are asymptomatic).**

Additionally, in April of this year, **the CDC issued new guidance to laboratories recommending a reduction of the PCR test’s Ct (cycle threshold) value to 28 cycles**

(from 40 cycles), **but only for fully vaccinated individuals being tested for COVID.**

Both changes will result in lower overall numbers of reports of “breakthrough cases” in the U.S.

The change in Ct value, for instance, will make the tests wildly less sensitive for vaccinated people, while keeping the tests overly sensitive for unvaccinated people. According to the European Journal of *Clinical Microbiology & Infectious Disease*, patients who test positive with a Ct above 33 are not truly infected (meaning they are not contagious or symptomatic, and carry barely any virus). An investigative piece by *The New York Times* revealed that 90% percent of people testing positive did not test positive until after 30 Ct (meaning 90% of “cases” carried barely any virus or were false positives.) So, the CDC’s decision will artificially deflate the amount of “breakthrough cases” (by well over 90%) in comparison to unvaccinated individuals.

It is quite clear that the CDC has a goal of decreasing vaccine hesitancy in the general public by creating the illusion that the COVID-19 vaccines are performing better than they truly are. We keep hearing from officials that the vaccines are “safe and effective,” but how could we possibly know this when the CDC seems concerningly disinterested in recording both adverse vaccine reactions and vaccine efficacy. The truth is: we don’t know much about these vaccines and the system is set up in a way that prevents us from uncovering true numbers.

It may be that people are not getting vaccinated “because science,” they are getting vaccinated “because science.”

The Tale of 3 Gatherings

By Andrew Rouchotas

Watching CP24 this past weekend, I witnessed the brain washing psychosis that is our state-controlled propagandist media. Live and in real time. There were three protests/gatherings in Toronto and they were shown in back-to-back to back segments. The media was able to eloquently demonstrate their ability to propagandize completely conflicting narratives while the masses freely accept the contradictions and narratives presented.

The first segment was about the “dangerous” freedom protests. A police constable joined the segment to discuss how dangerous these peaceful protestors were with respect to public health and safety and COVID safety protocol. He assured the viewers that such activity will not be tolerated and arrests will be taking place over the coming days and weeks.

The second segment discussed the sometimes violent Israel/Palestine protests in Toronto. Despite some hate-inspired unruliness police didn’t threaten the citizens or disperse the massive crowds. They instead worked

diligently to keep the protestors separated and enforced the importance of allowing peaceful protests in Canada. Ironically, this segment did not have a single mention of COVID or public health.

The third segment was focused on a massive gathering at a no appointment required vaccine clinic in Toronto. 1000’s and 1000’s of people aggregated and lined up to receive their vaccine. The crowd was so large that the wait time could exceed 1-2 hours. This gathering was of course shown as righteous, and presenting zero threat to public health and safety. The audience was

encouraged to come out and join. Ironically enough, the masses will read the above, and will both not understand what point I am trying to make, as well as, personally insult me for even daring to make such a point.

You can listen to Andrew Rouchotas’ podcast about this topic at <https://ch1.ca/the-jackals-are-out-in-full-force/>

Andrew Rouchotas is the CEO of Cartika (www.cartika.com) and the founder of the CH1.ca free speech platform.

An estimated 20,000 people came out to call for an end to the lockdowns at Queen’s Park, Toronto on Saturday, March 15, 2021. Photo by: Seth Vane

Declaration Of Canadian Physicians For Science And Truth

We are a broad and diverse group of Canadian physicians from across Canada who are sending out this urgent declaration to the Colleges of Physicians and Surgeons of our various Provinces and Territories and to the Public at large, whom we serve.

On April 30, 2021, Ontario’s physician licensing body, the College of Physicians and Surgeons of Ontario (CPSO), issued a statement forbidding physicians from questioning or debating any or all of the official measures imposed in response to COVID-19.

The CPSO then went on to threaten physicians with punishment – investigations and disciplinary action.

We regard this recent statement of the CPSO to be unethical, anti-science and deeply disturbing.

As physicians, our primary duty of care is not to the CPSO or any other authority, but to our patients.

When we became physicians, we pledged to put our patients first and that our ethical and professional duty is always first toward our patients. The CPSO statement orders us to violate our duty and pledge to our patients in the following ways:

1. Denial of the Scientific Method itself: The CPSO is ordering physicians to put aside the scientific method and to not debate the processes and conclusions of science.

We physicians know and continue to believe that throughout history, opposing views, vigorous debate and openness to new ideas have been the bedrock of

scientific progress. Any major advance in science has been arrived at by practitioners vigorously questioning “official” narratives and following a different path in the pursuit of truth.

2. Violation of our Pledge to use Evidence-Based Medicine for our patients: By ordering us not to debate and not to question, the CPSO is also asking us to violate our pledge to our patients that we will always seek the best, evidence-based scientific methods for them and advocate vigorously on their behalf.

The CPSO statement orders physicians for example, not to discuss or communicate with the public about

“lockdown” measures. Lockdown measures are the subject of lively debate by world-renown and widely respected experts and there are widely divergent views on this subject. The explicitly anti-lockdown Great Barrington

Declaration (gbdeclaration.org) was written by experts from Harvard, Stanford and Oxford Universities and more than 40,000 physicians from all over the world have signed this declaration. Several international experts including Martin Kuldorf (Harvard), David Katz (Yale), Jay Bhattacharya (Stanford) and Sunetra Gupta (Oxford) continue to strongly oppose lockdowns.

The CPSO is ordering physicians to express only pro-lockdown views, or else face investigation and discipline. This tyrannical, anti-science CPSO directive is regarded by thousands of Canadian physicians and scientists as unsupported by science and as violating the first duty of care to our patients.

3. Violation of Duty of Informed Consent: The CPSO is also ordering physicians to violate the sacred duty of informed consent – which is the process by which the patient/public is fully

informed of the risks, benefits and any alternatives to the treatment or intervention, before consent is given.

The Nuremberg Code, drafted in the aftermath of the atrocities perpetrated within the Nazi concentration camps – where horrific medical experiments were performed on inmates without consent – expressly forbids the imposition of any kind of intervention without informed consent.

In the case of the lockdown intervention for example, physicians have a fiduciary duty to point out to the public that lockdowns impose their own costs on society, including in greatly increased depression and suicide rates, delayed investigation and treatment of cancer (including delayed surgery, chemotherapy and radiation therapy), ballooning surgical waiting lists (with attendant greatly increased patient suffering) and increased rates of child and domestic abuse.

We physicians believe that with the CPSO statement of 30 April 2021, a watershed moment in the assault on free speech and scientific inquiry has been reached.

By ordering physicians to be silent and follow only one narrative, or else face discipline and censure, the CPSO is asking us to violate our conscience, our professional ethics, the Nuremberg code and the scientific pursuit of truth.

We will never comply and will always put our patients first.

The CPSO must immediately withdraw and rescind its statement of 30 April 2021.

We also give notice to other Canadian and international licensing authorities for physicians and allied professions that the stifling of scientific inquiry and any order to violate our conscience and professional pledge to our patients, itself may constitute a crime against humanity.

Below is a copy of the notice issued by the CPSO on their twitter account: (https://twitter.com/cpso_ca/status/1388211577770348544)

The College is aware and concerned about the increase of misinformation circulating on social media and other platforms regarding physicians who are publicly contradicting public health orders and recommendations. Physicians hold a unique position of trust with the public and have a professional responsibility to not communicate anti-vaccine, anti-masking, anti-distancing and anti-lockdown statements and/or promoting unsupported, unproven treatments for COVID-19. Physicians must not make comments or provide advice that encourages the public to act contrary to public health orders and recommendations. Physicians who put the public at risk may face an investigation by the CPSO and disciplinary action, when warranted. When offering opinions, physicians must be guided by the law, regulatory standards, and the code of ethics and professional conduct. The information shared must not be misleading or deceptive and must be supported by available evidence and science.

This declaration can be found & supported online at: CanadianPhysicians.org

The Little Church That Could

By Michael Van De Weghe

The Church of God and Pastor Henry Hildebrandt are no strangers to controversy. Over the years Pastor Hildebrandt has dealt with Children’s Aid Society and local law enforcement in Aylmer Ontario where the church resides. With mixed feelings from the community, the Church and its pastor continue to exercise their religious freedom as granted under the Canadian Charter of Rights and Freedoms.

As the covid-19 pandemic struck Canada and our governments sought actions to curb this communicable disease they instituted several laws that restrict the fundamental freedoms that all Canadians enjoy. The Church of God and several other churches across Canada stood up and said “No. This is unacceptable!” Freedom of religion is a fundamental right and a founding principle in the development of this great nation.

Despite the notwithstanding clause, section 33 of the charter, and its clear guidelines on the infringement of our rights, the federal and provincial governments have passed legislation and issued public health orders contrary to the notwithstanding clause. It’s as if no one told the government how this worked. The only power they have is given by we the people when we elect them. They answer to us — the citizens and the citizens have stood up and said the lockdowns, restrictions, and excessive, unlawful, and immoral fines have got to go.

Public health officials, like the brown shirts of 1930s Germany, have declared war on private businesses and the churches of Canada; especially those who hold fast in their right to be in business and those whose belief and faith are strengthened by worship and fellowship.

Across the country several churches, their pastors, elders, leaders, and the congregates themselves have been arrested, fined, and attacked. Artur Powlowski and his brother, Street Church Ministries, Calgary, Alberta – Arrested, fined, and their garage burned down. Pastor James Coates, Grace Life United, Spruce Grove, Alberta

— Arrested, fined, detained in jail for over a month, and along with Associate Pastor Jacob Spenst of Grace Life — had their church confiscated and fenced off. Pastor Tim Stevens, Fairview Baptist, Calgary, Alberta— Arrested after an unlawful Emergency Order was altered to exclude the general public. Pastors and elders at Weston Christian Fellowship, Halifax, Nova Scotia fined over \$11,000 and their congregation fined \$2,422 each for attending church. Pastor Jacob Reaume and elders at Trinity Bible Chapel in Waterloo County, Ontario along with 47 members all fined and their church ordered closed by the courts. Pastor René McIntyre of Trumpet of Truth Church, Woodstock, Ontario – Fined. Pastor Aaron Rock, Harvest Bible Church, Windsor, Ontario — Fined. Street Preacher David Lynn of Toronto, Ontario — Arrested and charged with Causing a Disturbance after being assaulted by passersby. Word of Mouth Mennonite Church, Colony Mennonite Church, Charing Cross Church, all throughout Chatham-Kent and Essex Counties, Wheatly, Leamington, and Dresden, Ontario has all had members fined.

While these attacks on Christian Churches and anti-lockdown protests across the country is appalling the health authorities and police services ignore the wilful and blatant protests of other religious services leading us to believe the intent is to target Christianity within

Canada. Many Canadians see this hypocrisy and can longer stand idly by while this discrimination continues. They are calling for the end of the infringements on our rights.

Pastor Henry Hildebrandt, along with MP Derek Sloan, MPP Randy Hillier, Kristen Nagle, a nurse who was fired for organizing a No More Lockdowns protest, and thousands of others have taken to the streets to publicly state that they do not approve of these draconian measures or the immoral and unlawful infringement of our rights. Pastor Hildebrandt has taken to the political stage to carry his message of freedom and unity for Canadians; he is a powerful speaker who

See, ‘Nothing’ p.9

Canadian Doctors Speak Out

Top reasons NOT to be afraid of covid

INTRO:

Dr. Stephen Malthouse MD (British Columbia)

Welcome to, Canadian Doctors Speak Out. We’re going to give you the top reasons not to be afraid of Covid.

When we hear the word covid or coronavirus, we now instinctively reach for a mask or look around to see how we can protect ourselves and our families. No place really seems safe, but as Canada medical doctors, we’re going to tell you what the best science now has to say and we think you will be pleasantly surprised.

On the TV we hear cases, cases, cases, which would frighten anyone, but cases are not necessarily symptomatic people. The vast majority have few or really no symptoms of being sick. They just have a positive PCR swab test. Research now shows that the PCR test is practically worthless. Only 3% of patients with a positive test actually have the covid virus. People have died. Yes, that’s true, but using case numbers gives a false picture of what is really going on.

Here is a graph showing the covid cases reported each week in Canada. Even I get frightened looking at this graph. But now let’s put the weekly deaths on the same chart. Where are all the deaths that we would expect to follow the cases curve? Something is really fishy here.

Let’s look at yearly deaths in Canada from 2001. It’s pretty hard to show that we’ve even had a pandemic. The slight increase in 2020 was probably due to an aging population.

Number of deaths in Canada from 2001 to 2020

(in 1,000s)

But aren’t our hospital intensive care units overloaded with covid patients? If we look at the Ontario Intensive Care Unit data, there are fewer patients in the ICU in 2020 than in each of the previous three years. The CDC’s own data compares covid to the seasonal flu. In children, covid illness is so mild their death rate is statistically zero.

TIME PERIOD	2017 (1-16 Dec)	2018 (1-16 Dec)	2019 (1-16 Dec)	2020 (1-16 Dec)
ICU OCCUPANCY	86.66%	91.21%	83.51%	80.84%

For people under 50, the infection survival rate is greater than 99.98% and for those over 70, it is 94.6%. And that is without any early treatment whatsoever, like vitamin D or vitamin C. So if you’re young, you really don’t have anything to worry about. If you’re older, but we’re going to give some really great ideas on how to protect your health that do not include getting a shot with a vaccine.

ASYMPTOMATIC TRANSFER:

Dr. Patrick Phillips MD (Ontario)

So back in April we knew so little about covid and this led us to take a lot of extra precautions including adopting the idea that healthy people can spread disease. This is known as asymptomatic spread and that’s a very scary thought. Now however, over 10 million cases have been studied and evidence is rapidly emerging both from Wuhan and the University of Florida showing that asymptomatic and pre-symptomatic spread are negligible to non-existent.

This is a game changer. This means that we can take our lives back and go back to the time tested advice I’ve always given my patients when they have a virus. If you’re sick, stay home and the rest of us can be free to live our lives.

T CELL IMMUNITY:

Dr. Caroline Turek MD (Ontario)

We have great news. Do you know that many of us are already immune to SARS COV-2 due to cross-reactive t-cells? A T-sell is just another immune cell that helps our body fight infection. At the beginning of the pandemic, SARS COV-2 was considered a novel Coronavirus meaning that none of us were immune to it and all of us were still at risk for infection. However, immunologists and virologists worldwide have studied and found that 30% to 50% of people already have pre-existing immunity to SARS Cov-2 from pre-existing circulating t-cells. This pre-existing immunity is due to prior exposure from other corona viruses such as the common cold. So the problem with testing for covid immunity is most of the tests are serum antibody tests. But this doesn’t look at our t-cell response and antibody levels decline over time but we still have our t-cells to protect us.

Many, many of us are more protected than we realize from covid from our t-cells. This is exciting news because we are closer to herd immunity than we realize.

KIDS & COVID-19:

Dr. Neda Amani MD (Ontario)

We have heard a lot about how children are covid super spreaders. Terrified, we have shut down our schools, covered our children’s beautiful faces with masks and stopped them from playing with one another.

Many teachers are too scared to even step foot into a classroom, but the science shows that none of this is warranted. If children do get covid-19, they might not even show any symptoms, and if they do they’re usually mild and they’re not the drivers of the pandemic. Epidemiological data shows the disease follows a much milder course in children compared to adults. Since the pandemic began, only four people under the age of 19 have died with covid in all of Canada. That’s four out of eight million children and teenagers.

By comparison, 10 children died of influenza in the 2018 to 2019 flu season. Influenza has killed more children annually than covid-19.

An overwhelming number of peer-reviewed studies now show children, especially those under the age of 10, are not a significant factor in the transmission of covid. Studies in the UK, Australia, Switzerland, France and Norway have shown that there is minimal child-to-child and child-to-adult transmission in schools.

A study in The Lancet also showed that closing schools was never medically warranted. A German study of parents and their children showed that parents are way more likely to infect their children rather than the other way around.

When we look at the large and growing body of scientific evidence, we can put the fear behind us and let our children be children again. They can go to school, play, be with their friends and do the things they love. It’s time we give our children their life and childhood back.

PREVENTION:

Dr. Dorle Kneifel MD (British Columbia)

I am not afraid of this coronavirus and you do not need to be afraid either. We’ve evolved with these respiratory viruses over thousands and thousands of years and we’ve developed a highly intelligent and very sophisticated immune system. We support and strengthen our immune system when we eat nutritious food, when we engage in physical activity, when we spend time in nature and feel supported by life.

Vitamin D is a critical nutrient for our immune system. When we supplement with vitamin C, with zinc, with magnesium, our immune system is primed and ready to go. In spite of sub-optimal diets and widespread vitamin D deficiencies, most people who encounter the coronavirus do not require hospitalizations but are able to manage their symptoms at home.

I myself had covid-19 11 months ago, and I responded to the early viral symptoms the way I always do. I took vitamin D, 60,000 international units each day, until the symptoms were gone. It took two days. The fact that I am here talking to you is proof that our bodies know what to do.

TREATMENTS:

Dr. Bill Code MD (British Columbia)

I have more than 40 years experience practicing medicine here in Canada and at least 30 of those have been as a specialty anesthesiologist with the FRCPC. Anesthesiologists are well accepted as clinical pharmacologist by other physicians because we know the risk-benefit ratio about drugs. In addition, safe and long-experienced use of older drugs can be very useful in combating a new problem such as covid.

With this in mind and reviewing the literature, I treat my patients with early covid-19 with quercetin, zinc, vitamin C & vitamin D. If you’re able to get a prescription, hydroxychloroquine and azithromycin. In addition, I have used Ivermectin for post-covid symptoms with some success. If needed, oxygen supplementation with nasal specs, often based on what your personal oximter, which I recommend, says for you.

In all of the patients that I have treated, this regimen has worked for them and they have not needed hospitalization. I myself had covid 19 in November last year. Taking these agents as I’ve listed was incredibly helpful for me and I recovered within 7 to 10 days. In summary, I would like to have you let go of the fear. It does not serve us.

There are many things that we can do for ourselves, and then we’ve got the hospital as back up.

What Does It Mean To Be Healthy?

By Jason Christoff

The word healthy is actually “heal-thy”, which in a nutshell is based on a concept of us healing ourselves. Although we’re supposed to be the guardians of our own health, we’ve been taught that it would be more effective and more efficient to outsource this personal responsibility to health care professionals.

As we’ve outsourced our health to various systems and structures over the past 70 years, what outcomes have manifested in our society? These outcomes can be measured with precision using published statistics. We can also apply our common sense, in the form of normal everyday observations. Statistically, the outsourcing of our health to various institutions, which fly the flags of health care, has been a catastrophic failure.

Cancer was 1 in 30 in the year 1900. Now half of all North Americans will encounter cancer in their lifetimes. This 1 in 2 cancer probability is also travelling quickly in the wrong direction. These statistics are only getting worse. Every other disease on record is also growing by leaps and bounds in the wrong direction. We are officially the sickest, most dysfunctional and most mentally unstable population to ever walk the planet. A society this sick and dysfunctional has no chance of perpetuating itself and yet we continue embracing various systems that continually fail us.

In the year 2000, a commentary article was written by Dr Barbara Stanfield, MD, MPH. It was published in the *Journal of the American Medical Association (JAMA)*, July 26, 2000—Vol 284, No. 4). It came to the firm conclusion that the US medical system was causing the premature deaths of 225,000 Americans every year. This translated to the conventional medical system in the United States being the 3rd leading cause of premature death, behind only cancer and heart disease.

A study in the European Union in 2012 came to the exact same conclusion as well, with preventable medical injuries in hospitals and adverse reactions to medical drugs leading the way for premature death in that area

‘Be not afraid’

Continued from p.4

VARIANTS:

Dr. Stephen Malthouse MD (British Columbia)

Many of us have heard about something that is designed to scare the living daylights out of you. It’s something we’re hearing 24/7 pumped through the television set, and that’s the possibility of dangerous variants.

Now, here’s something that will surprise you. One slight variant was artificially created after a lot of hard work in a mouse study. The so called variants had never been found in humans. This was followed by some papers with mathematical modelling and coding, not real life observation. This was simply guesswork about spread and severity, not real research with human beings.

That is the sole foundation of all you’re hearing about on the TV. Viruses naturally change over time and new strains emerge. Since the virus cannot live alone but depends on human cells to live, it makes evolutionary sense that it will become less dangerous, not more so over time. If it becomes more easily spread, but less likely to make you really sick, and that is a good natural progression towards herd community.

The covid virus is no different. Over all the time we have studied viruses, that is what they’ve always done, adapt to humans as humans adapt to them. We can all relax since viruses always become less likely to cause harm as time goes on.

A WAY OUT FOR EVERYONE:

Dr. Stephen Malthouse MD (British Columbia)

When you put it all together, there are so many reasons not to be afraid of covid. When we honestly evaluate the covid evidence and stop being fearful, you can start living life fully, become a joyful member of our family and community again. Hiding inside your home and avoiding people... it’s not necessary.

Humans are social creatures and do not do well in isolation. For one thing, both solitary confinement and fear are harmful to your immune system. Four hugs a day are indeed the minimum. So make sure your nutrition is good and don’t forget to take Vitamin D in the winter time to optimize your immune system. 4000 international units is a good daily amount for Canadian adults, followed by a blood test in about a month to make sure that’s the right amount for you. Vitamin D is safe, inexpensive and has been shown to boost resistance to viral respiratory infections including covid.

And remember, the real virus is fear. It stops a person from thinking clearly. Now is the time to turn off your TV

of the world. This information is also purposely hidden from the public. The media doesn’t report it, politicians don’t warn their constituents and Silicon Valley gate keepers routinely shadow ban information like this from their search engine results.

Are we healthy? No, we’re not? Are we continuing to cheerlead, finance and incentivize these systems that have very little chance of making us healthy? Yes, we are. This illogical behavior is now starting to crack the very foundations of our civilized and prosperous society.

Although this story sounds like it couldn’t get any worse, it does. It gets much worse. After the data was released in the *JAMA* commentary article in the year 2000, that data was quickly reviewed by many concerned citizens. One group of concerned citizens were Gary Null, PhD; Carolyn Dean MD, ND; Martin Feldman, MD; Debora Rasio, MD; and Dorothy Smith, PhD. After reanalyzing the data presented in the *JAMA* article, it was easy to observe that some cherry picking and manipulating of the original data was indeed in play. Reanalyzing the same data, without prejudice or spin, easily concluded that the conventional medical system in the US was indeed the #1 cause of premature death. The US conventional medical system was causing the premature death of at least 783,936 US citizens every year. This concerned group published all their computations in a book titled, “*Death By Medicine*”, released in 2010. *Death by Medicine* can now be found free of charge as a PDF using a simple search of duckduckgo, which is a much more unbiased and truthful search engine compared to Google.

The second and third leading causes of death in the United States are heart disease and cancer, in that order.

When we look at our conventional medical hospitals in the United States, Canada and the EU etc... it’s easy to see that an anti-health philosophy is being embraced, in a way that appears we’re being ruled more by an anti-health cult than legitimate science. In many Canadian hospitals junk food machines can be found every 800 feet, fast food restaurants are often housed within our hospital walls or grounds and the hospital food served to patients could make a maggot turn its nose up and walk away. All these chemically laced dead anti-food like things, found in most hospitals, are also tied directly to cancer and heart disease. In short, this system seems more interested in producing sickness than eliminating it.

Is the conventional medical system doing a good job with acute care and trauma-based emergencies, like car accidents and natural disasters? Absolutely! This is where modern medicine shines. Is the conventional medical system doing a good job leading our society into better health, regarding the elimination of chronic disease? Absolutely not. Statistically, it can be argued that this system is what’s driving our disease epidemics skyward. If we’re brave enough to judge real-world results on the street level as well, most people will come to the exact same conclusion.

It’s time to stop outsourcing the personal responsibility for our health to a system that refuses to look in the mirror at the complete inversion it has become. A system of health care that produces a never-ending tsunami of disease can’t be tolerated, unless that society is founded on inversion and nihilism. If the conventional medical system eventually changes because it develops the courage to look in the mirror and finally embraces logic, that’s great. If it doesn’t, it’s time to move on. For anyone wanting to start their own independent and empowered health journey, I would suggest reading the book, “*How to Eat, Move and Be Healthy*” by Paul Chek.

Jason Christoff is a Freedom and Health Advocate

set and learn how to do some reasoning for yourself. It doesn’t take a doctor or even a rocket scientist to figure it out.

Just look out your own front door and see what is really happening. The evidence is clear... you do not need to be afraid of a little covid virus.

The above was transcribed from a video from The Canada Health Alliance. You can find references to everything spoke of on their website at www.CanadaHealthAlliance.org.

Below is a statement from The Canada Health Alliance website:

- Based on medical evidence, we call on all levels of government to immediately stop promoting the following measures:
- The use of an inappropriate and misapplied test i.e. RT-PCR to determine policies
- Mismanagement of hospitals and other medical facilities with unnecessary COVID restrictions
- Lockdowns of businesses
- Closure of churches and other places of worship
- Closure of schools, daycares, gyms and special needs care centres
- Closure of playgrounds, parks, and other recreational facilities
- Inordinate and ubiquitous hand-washing with disinfectants
- Mandated and inappropriate physical distancing
- Mandated and inappropriate mask wearing
- Promotion or requirement of COVID-19 vaccination with inadequately trialed, experimental gene-modifying products
- Mandated and inappropriate social isolation
- Quarantine of asymptomatic people
- Misrepresentation of the COVID situation in the media
- The use of fear and other psychological manipulation to coerce the public into following harmful mitigation measures
- The lack of transparency and accountability of public health agencies
- The failure to promote evidence based preventative and therapeutic treatments
- **The above measures are not based on any current medical evidence, research, human safety trials or on-going evaluations. Further, these policies are in direct opposition to medical practitioners’ oaths to do no harm.**

“THEY”

Who Exactly is Behind the Psyops?

By Guy Crittenden

A question commonly arises in discussions about the COVID psyops and related disinformation campaigns, in response to claims that they are doing this and they are doing that: Whether it’s the manufactured biological crisis, the weaponized DNA-changing injections, or (more recently) the threat of a global cyber attack — and even a staged alien invasion — people naturally ask, “Who, exactly, are ‘they’?”

This is a reasonable — even crucial — question. The growing number of people questioning the official narrative around the virus, lockdowns, masks and social distancing must eventually answer that question, as evidence and also to identify the perpetrators for prosecution.

We’re not going to get anywhere until people stop dismissing new information as conspiracy theories — spell words that have dead-ended decades of convincing research into everything from the JFK assassination’s magic bullet to the collapse of WTC Building 7 on 9/11. The Davos set has conditioned people to fence their own thought process, such that their manipulation of international events and limit hangout strategies remain effective. (Limited hangout is a damage control strategy intelligence agencies use to deflect public attention from a serious problem by allowing discovery of a more trivial one.) As the sterilization and depopulation dimensions of the current inoculation program become known, the oligarchs will throw minions like Anthony Fauci under the bus to satisfy public outrage while preserving the identities of the true puppet masters.

My own journey into figuring out who “they” are began long before the first crisis actors in Wuhan appeared in last year’s embarrassingly contrived COVID-19 death porn. After leaving a salaried media job in 2014 to become a freelance writer, I heavily researched the clandestine dimension of geopolitics. In the ensuing years I found myself fighting depression as the walls of social programming came tumbling down and I learned that we (the so-called western democracies) are not the good guys; our intelligence agencies lit the fuse of almost every war, civil war, coup d’état or secret torture program on the planet for the past century. JFK was not assassinated by a lone gunman. The Twin Towers were not brought down by a guy on a satellite phone in some Afghani cave. And no, America never landed a man on the moon. (Sorry to break that to you: please also seek out Stanley Kubrick’s deathbed confession, the Wikileaks footage, and the superb 1990s article series “Wagging the Moondoggie” by Dave McGowan. You’ll be amazed you fell for it.)

When the COVID psyops hit, and (later) the facts about the “vaccines” killing thousands of people and injuring hundreds of thousands more, I was primed. Though I previously thought more in terms of US imperialism than a globalist takeover, I knew agencies of the state security and surveillance apparatus created almost every terrorist organization we’ve ever heard of, including the Muslim Brotherhood that the CIA has used for decades to destabilize the Middle East. I knew the three-letter agencies such as the DHS (which has around 250,000 staff!) are the operational arm of bank and business cartel that ensures global wealth flows into the coffers of a tiny elite that uses its unimaginable wealth and power to corrupt governments, agencies, NGOs and institutions and orchestrate world events to generate more of the same.

Okay, so back to the question: Who are they? Let’s start with the low-hanging fruit.

Although he’s not the absolute top of the pyramid, people have figured out that World Economic Forum founder Klaus Schwab is quarterbacking the overall strategy to usher in what he calls the Fourth Industrial Revolution (4IR) and its Internet of Things (IoT) and Internet of Bodies (IoB) (all the cyborg marriage of man and machine stuff). Like a spider in its web, Schwab sits

at the center of the Davos set and its interlocking circle of secretive organizations, some of which were founded by the Rockefeller’s. These include the Bilderberg group, Council on Foreign Relations (CFR), Trilateral Commission, Club of Rome, and (especially) the Round Table Group.

Meshing with these organizations, and centrally coordinating them, is the United Nations (whose New York headquarters sits on Rockefeller-donated land) and its offshoot agencies such as the World Health Organization (WHO), International Monetary Fund (IMF) and World Bank. The UN and its toxic offspring are not quite the League of Nations many presume: in fact, these agencies have economically colonized hundreds of poor countries around the world on behalf of rich nations and, in the case of the WHO, have experimented for decades in sterilization of human populations via vaccines, mostly in Africa and India. The UN’s Organization for the Prevention of Chemical Weapons (OPCW) even falsified results from its investigations into gas attacks in Syria, which were staged by Western-backed mercenaries and not President Assad. When OPCW whistleblowers came forward, they were silenced and their claims were ignored. Just who are they protecting, exactly?

These UN agencies have massive conflicts of interest in their funding and staffing; the WHO fronts for the pharmaceutical industry, of which it’s a near wholly-owned subsidiary. Private interests coordinate the corrupt UN agencies with equally corrupt national agencies such as the USA’s Food and Drug Administration (FDA) and Center for Disease Control or CDC, which has been exposed for funding secret and illegal “gain of function” virus bioweapon programs in a Wuhan laboratory. The main go-between is Bill Gates — the calculating and sociopathic (according to his business partners) tycoon who cornered the software market and now plans — as the world’s most famous non-doctor — to corner the “healthcare” industry and its highly lucrative vaccine arm. (Gates, let’s not forget, paralyzed 500,000 young girls in India, before using his wealth to scrub that fact from the internet.) Fauci is an old research and business partner of Gates, as was Jeffrey Epstein, who ran the Mossad honeytrap that ensnared prominent politicians and influencers, including cer-

tainly Prince Andrew and Bill Clinton, plausibly former President Donald Trump, and possibly Gates himself. (Is that why Melinda is leaving?)

Some of these men are the richest and most powerful in the world. Or so we’re told. In my years of independent research, watching documentary series like Oliver Stone’s *The Untold History of the United States* or reading books like Howard Zinn’s *A People’s History of America* and John Perkins’ *Confessions of an Economic Hitman* (and most recently Jeff Berwick’s tome *The Controlled Demolition of the United States*), I often had a sense of a thumb on history’s scale. It seemed like shadowy actors were pulling strings behind the scenes.

Enter the researchers and journalists that the legacy media has gone out of its way to discredit. These include some prominent conspiracy theorists whose ideations now seem eerily prescient about secret societies and a planned globalist takeover. Their suggestions that long-established oligarchies work through secret societies gained credibility in 2020 with revelations about the upper-tier Freemasons, Skull and Bones alumni, Bohemian Grove, and the Jesuits (including the papacy itself, that’s endorsing the dangerous inoculation program which uses aborted fetus cells). The work of these high-profile investigators is supported by less famous research journalists including Canada’s James Corbett, Australia’s Max Igan, Ireland’s Dave Cullen, and America’s Whitney Webb, who together have proven Big Data is working with Big Pharma to install an AI-controlled technocracy.

But it was only when I encountered research on the Committee of 300 that I felt the curtains open fully on the families and corporations that rule our world. As Conspiracy Wiki describes it, the Committee of 300 is “an international council which determines the political, economical, banking, media, and the military policy for centralized global efforts.”

This exclusive club evolved from the British East India Company, established in 1727 by British aristocrats who referred to themselves as the “Olympians.” The number 300 is derived from an article by Walter Rathenau of General Electric who wrote in 1909 that, “Three hundred men, all of whom know one another, direct the economic destiny of Europe and choose their successors from among themselves.” In partnership with the Dutch East India Company, the British overlords established vast fortunes via the opium trade in Asia that they controlled, much as they still control the heroin and other drug trades in the world today, laundering their profits through banks they also own or control.

The go-to reference for all this is *Conspirators Hierarchy: The Story of the Committee of 300* — a book written by Dr. John Coleman, a former MI6 British Intelligence agent and whistleblower whose more than 10 books uncover the New World Order and how the committee socially engineers various crises to accrue more wealth and power to its members. This paragraph from the book summarizes Coleman’s claim:

“The Committee of 300 is the ultimate secret society made up of an untouchable ruling class, which includes the Queen of England, the Queen of the Netherlands,

Cabal In Control?

Continued from p.6

the Queen of Denmark and the royal families of Europe. These aristocrats decided at the death of Queen Victoria, the matriarch of the Venetian Black Guelphs that, in order to gain world-wide control, it would be necessary for its aristocratic members to ‘go into business’ with the non-aristocratic but extremely powerful leaders of corporate business on a global scale, and so the doors to ultimate power were opened to what the Queen of England likes to refer to as ‘the commoners.’

The committee is behind the money laundering and tax avoidance schemes coordinated by the City of London — a corporation (not a municipality) exposed in the brilliant documentary *The Spider’s Web: Britain’s Second Empire* — and the social engineering policies advanced by Oxford University Fabian socialists that include Canada’s Deputy Prime Minister Chrystia Freeland (a George Soros acolyte who’s also Prime Minister Justin Trudeau’s handler). Coleman describes how social engineering techniques developed by the UK’s Tavistock Institute are disseminated by Chatham House (the Royal Institute of International Affairs) and used in divide-and-conquer strategies to colonize domestic and foreign populations, ergo the Soros, and China-funded BLM group, and the various gender and racial identity politics schemes currently shredding civil society.

According to Coleman, notable Committee of 300 members include: the British and Dutch royal families,

the House of Hapsburg, Lord Halifax, Winston Churchill, Cecil Rhodes, George Bush, Aldous Huxley, Henry Kissinger, David Rockefeller, Giuseppe Mazzini and H.G. Wells. His account of Kissinger’s career substantiates how UK oligarchs dictate American foreign and domestic policy, and foment wars wherein these people profit from funding and arming all sides. And the cesspool known as the New York Port Authority deserves mentioning, as it coordinates real estate schemes via which American tax dollars are diverted to support offshore schemes.

The Committee of 300, or a subset, is likely behind the Georgia Guidestones — a NWO monument erected in 1980 in Elbert County, Georgia that promotes reduction of the human population to just 500 million souls. COVID, it appears, will midwife the global warming/climate change agenda, i.e., the committee’s ultimate Net Zero Carbon scheme in which the majority of human beings have no place.

Of course, Coleman’s work needs updating, but knowing who the conspirators are will greatly assist resistance leaders like Robert Kennedy Jr. and Del Bigtree in their legal actions against corrupt companies and agencies, and Germany’s Dr. Reiner Fuellmich — an international trial lawyer who successfully sued large fraudulent corporations like Volkswagen and

Deutsche Bank — and his team of 1,000 lawyers and 10,000 doctors who plan to establish Nuremberg 2.0 trials.

We’re naming names now. Action will follow.

Is There Already A World Government?

By David Wilson

Within months of a pandemic being declared, virtually all governments throughout the world had agreed on an almost identical response. These are the same countries that over decades and centuries have failed to agree on religion, language, cuisine, currency or how best to run a football tournament.

At the World Economic Forum’s (WEF’s) annual meeting in Davos on January 24th 2020, Bill Gates’ ‘Coalition for epidemic preparedness and innovations’ held a press conference to announce a new partnership to develop vaccines for ‘covid-19’. At this stage, the number of confirmed worldwide cases was still in the hundreds. So this doesn’t look like a rapid response, it looks preemptive. But to what extent are Gates and others planning ahead to protect health worldwide, and to what extent are they actually inflating the idea of a pandemic, then sponsoring the media to paint it big and bad enough to bring the world to its knees, and then miraculously have the cure rolling out within months to save us all? It all looks a little... manufactured.

The pandemic was declared by the WHO on the 11th March 2020 and within months a cast of characters including Biden, Trudeau, Johnson and even Prince Charles were talking about a ‘Great Reset’. By the end of the year, Xi Jinping was on the bandwagon. How could leaders of so many diverse countries and organisations agree on a plan, have it written up, cross-checked and rolled out in such a short time? Unless this plan was waiting in the wings, for just such an excuse as a worldwide pandemic? It would take a deeply cynical person to suggest that the disease might have been

deliberately released; but the UK and US going to war with Iraq on the pretext of WMDs when there were none dented my trust in governments, and the use of depleted Uranium, Napalm and Agent Orange shows that they have in the past done whatever it takes and to hell with the consequences. But, even if we give them the benefit of doubt and say this was a naturally occurring disease then the reaction has been so massive as to suggest there is a bigger, hidden agenda.

Most people have great respect for the Gates’ and Bezos’ of the world. Where would we be without comput-

had seen through the enfolding plandemic and resisted the lockdown rules in order to keep their services available, where would they be now? But those companies that rush the vaccine through make billions, getting the laws changed along the way so that they are never held responsible for any side-effects including deaths of which there have been thousands. At an average of \$20 per shot, 2 doses per person and the aim of corralling all 7.8 billion inhabitants of the world; that’s \$340 billion. And those pesky variants could mean another \$340,000,000,000 each next year.

We have seen the White House change hands and it not make the slightest difference to the WEF control and the same would undoubtedly be true if Labour were to be elected here. It has crept up on us but the WEF, WHO and IMF now appear to control the governments and the world’s nations, and not the other way around.

It has been only 30 years since the launch of personal computers and the World Wide Web. So much has changed in that time and it seems that the rate of change will accelerate further and faster with the rise of artificial intelligence, the digitalisation of money, satellite surveillance, the internet of everything and

genetically modified crops, animals and humans. The danger is that right now, the satellites are already being launched, the banks are preparing for a cashless society and factories and vehicles are being converted to be run by machines not humans. And the question is...has anyone asked you if that’s what you want?

If, as looks very likely, we the 99% lose control, it is unlikely we will ever get it back. We may continue to line up to cast our vote, but we will be doing little more than choosing a different coloured rosette each time.

Everyone on earth is aware that the system we live under is potentially just and fair for all, that those who govern can work to ensure our well- being. We simply have to demand that we are given our say on our future, and insist that we have a say in the big decisions that will affect us all.

The simplest thing we can do is to talk. Talk to friends and relatives, calmly, intelligently and persistently. To encourage them to watch and listen to some of the excellent films and podcasts made by some very smart dissenters. If we can spread the information, change some minds then mass noncompliance too big to be ignored becomes possible. By joining in and speaking out, then whatever future we face, we will be able to say that at least we fought back.

ers and home delivery after all? The WEF surely mean well, but it is important to stress they are not elected. We pride ourselves on our democracy but these people are not in any way accountable. The CEOs of the world’s richest companies who all get a seat at the table didn’t get where they are because they are kind, caring and considerate. The only way for these companies to get a seat at next year’s WEF is for them to remain amongst the most profitable in the world. There are no prizes for compassion and compromise. Imagine a company that

The Government Acting Like Our Parents Is Completely At Odds With How A ‘Free’ Society Is Supposed To Function.

What Is The Role Of Government?

By Spencer Fernando

It’s something we no longer discuss much in Canada, since all the main political parties (both provincially and federally) have decided the role of the government is to protect you from yourself.

But shouldn’t we be discussing this? Shouldn’t we be having a conversation about whether the government is supposed to defend our rights, or be our parent? After all, we have completely abandoned the idea of treating people like adults. Consider the tone of voice many provincial leaders and public officials use when addressing the public.

They talk as if they are speaking to children. They talk as if everyone watching is a fool. And they talk as if it is their job to decide how much risk we can take. That’s how a parent talks.

By contrast, the government is supposed to be our peer. In fact, they are supposed to serve us. We used to use the term ‘public servant’ a lot more often to refer to politicians, though nowadays that rarely seems appropriate. A servant, or a peer, or an employee. That’s how we are supposed to look at those in office, and those who work in the government that is supposed to serve us.

But have they acted like ‘servants’ or ‘peers?’ Or have they acted like arrogant rulers, who demand a shocking level of power to dictate every aspect of our lives – for our ‘own good?’ Clearly, it’s the latter.

Consider that as much of the rest of the world opens up – including our neighbours to the south – Canada is one of the most locked-down places, with some provinces issuing even stricter rules in the last few days.

Further, as we’ve seen throughout, there has been no creative thinking, and no adaptation. For example, at a press conference, Jason Kenney was talking about how the United States has far more ICU beds per-capita than Alberta does. Of course, Kenney is the Premier of the province, and is thus responsible if the system can’t handle things. To talk as if he’s some disinterested observer noting an ICU bed disparity is quite odd. And of course, the importance of fitness and the risk of obesity is still completely ignored, with fitness actively discouraged by those in power as they shut down outdoor events.

Many ‘leaders’ have also arrogantly lectured and blamed the public, despite the many reversals, contradictions, and outright hypocrisy of politicians who are stumbling around in chaos. How many times were we told, “we’re all in this together,” while tens of thousands of small businesses were wiped out, hundreds of thousands of Canadians lost their jobs, and the politicians kept getting their full, guaranteed salary throughout? The fact is, there was obviously one set of rules for the politicians, and another for the rest of us.

Again, that mirrors how parents and children interact. Parents get to do many things that children can’t. Often, we hear about the ‘do as I say, not as I do,’ attitude, and that’s exactly how governments of all stripes have acted. Yet, the government is just a bunch of adults, serving other adults. It shouldn’t be a parent-child relationship at all. We don’t have rights, we have privileges. Many Canadians believe we have rights.

And sure, we have a Charter of Rights and Freedoms. But how much good has it done in the past year and a half? Let me ask you a few questions:

Do you have the right to leave your home and go for a walk?

Do you have a right to keep your business open and choose what level of risk you and your customers are willing to face?

Do you have a right to gather with your family indoors or outdoors?

Do you have a right to gather and worship?
Do you have a right to exercise outside?
Of course, you may think that you have those rights. But you don’t.

If a right can be extinguished and ‘suspended’ simply on the whim of a provincial Premier (and make no mistake, regardless of claims to be ‘following the science, this all comes down to what Premiers decide), then it’s not a right, it’s a privilege. It’s a privilege granted to you by politicians, just as a parent grants their child an allowance or lets them go to their friends house.

I really want you to think about this, and talk to people you know about it. What rights do we really have? Many of the most basic freedoms we assumed

were ironclad have been ‘suspended’ with shocking ease by those in power, including by those who once claimed they didn’t have the power or authority to do so. Somehow, the power for politicians to restrict free-

dom in Canada always manifests itself, while our freedoms are quick to evaporate.

Many politicians now seem addicted to this unhealthy parent-child dynamic. That’s certainly the case for Doug Ford, who announced a ‘re-opening’ plan that is anything but:

“If you wanted to design a pandemic reopening plan that didn’t do much actual reopening, it would look exactly like the steaming mess Ontario Premier Doug Ford and his skilled team of advisers deposited on long-suffering Ontarians Thursday.

Hacking Of The Human Mind: “They” Vs “Us”

By Beverley Dujay-Macdonald

Can you hear their laughter? Can you? It comes from over there on the other side of the darkened glass wall...a wall that ‘they’ erected. This wall separates us, the natural citizens of Earth from ‘they’ who live over there. Listen! Can you hear it? Their laughter is sinister. We, over here on this side of the wall abide by the rules...rules they have made. We are the human beings who live on the same planet as they, yet on unequal ground. Our ground is lower but somehow we do not clearly see this because most of us have been dumbed-down since birth...had our minds played with. They on the other side have convinced us that we are free, but we are actually their slaves. We believe we need them. We work for them and give them our trust. In return, they give us just enough so that we think we can live well and feel safe. But they have more, much more of Earth’s bounties. They have the best. They own it all. They own us. They laugh at all this. We don’t acknowledge the unhealthy power they hold over us. Instead we obey them. By obeying, we give them more power. They laugh at our ignorance. They laugh at us all. Can you hear them on the other side

Ford’s so-called “Roadmap to Reopen” describes an epic journey that doesn’t even begin in any significant way until June 14. Then there will be limited retail and some additional outdoor activity (although golf courses and tennis courts can start earlier, reopening this long weekend) .

At a minimum, it will take an additional 42 days to reach stage three of Ford’s plan, which is still not a full reopening. People have sailed around the world in less time. Ford repeatedly called his plan “cautious.” No kidding. He thinks it won’t be safe to get a haircut until 70 per cent of Ontarians have received one vaccination and 20 per cent have had two.” Indeed, while schools are going to be opened in much of the country, they will remain closed in Ontario.

Apparently ‘the science’ differs across provincial borders. Making this stranger is the fact that Dr. Williams in Ontario says he’s been pushing for school openings for some time: “Ontario’s Dr. David Williams, just now: “I have been pushing for schools to reopen now for 3 – 4 weeks.” !!!”

Ford – who says he’s following the experts – now seems to simply go for the most restrictions he can. Ford, like Trudeau, and like many other politicians in Canada, have decided that they are meant to act like parents and treat us like children.

Rather than give advice, and then respect the voluntary right of Canadians to make our own choices and take our own level of risk, they insist on treating us as if we are children who need to be told what to do and need to be controlled ‘for our own good.’

And, while we are all told this is temporary, a precedent has been set for a huge overreach of government power. What happens if an upcoming flu season becomes more deadly than usual?

Will we all be restricted again?
Will our ‘rights’ once again be revealed as nothing more than privileges doled out by politicians?

Instead of continuing on this anti-freedom path, it’s time to start treating people like adults again.

This article was originally published at www.SpencerFernando.com

of the wall? They who hold the controls to our lives are all laughing. They tell us what we should do for our own safety and well-being. And we do it. They tell us by way of television what we need in order to enhance our lives. And we believe it. They tell us what to eat and then they laugh when we eat it. They know their food will harm us. This is what they want...to harm us. They laugh when we take their healing products...their medicines, because they know these drugs will make our bodies sicker. They laugh when they offer us mind-altering substances for our pleasure because they know these substances will soon deaden our spirits. They want us dead. They poison our water in the name of health. They poison our food in the name of feeding more people. They poison our soil in the name of agriculture. They poison our atmosphere with chemicals and tell us we are mad when we mention it. They poison our planet with technology all in the name of progress. They build communication towers for the technical advancement of the human race knowing full well their alternative motives are for a control agenda. They create laws which they say benefit us over here on this side, but in reality

Clear As Mud: Ontario’s Three Stage Reopening Plan Is Questioned, Ignored Or Rejected By Most

By Chuck Black

Ontario has announced a three-step plan to reopen the province, starting with outdoor recreational amenities, as it gradually prepares to ease pandemic restrictions. But the plan, announced Thursday, doesn’t seem to have impressed anyone and doesn’t include any plans to reopen public schools.

The province is basing each of the three newly defined stages of reopening on an increase of vaccination rates amongst the general population, but not on the amount of any actual disease across the province.

This metric seems to guarantee the profitability of the vaccine companies and is pretty easy to control by constant vaccinations (and prizes for those who vaccinate the most) but doesn’t really say anything directly correlated to healthcare.

And the public seems to have finally begun to notice the contradictions and omissions of this new plan and all the other previous plans and has begun to ignore the provincial pronouncements.

At the very least and as outlined in the May 21 CTV News post, “‘Living my life’: People head north to cottages despite Ontario’s stay-at-home order,” large numbers of Ontario cottage owners have decided to ignore existing regulations and are venturing out of their communities to travel long distances to visit their summer cottages.

This comes despite the Ontario province-wide “stay-at-home” edict which officially restricts provincial resi-

dents from traveling in the province for anything but “essential” activities. Ignoring the edicts could bring fines

constitutional laws.

An example of this approach is the hair salon industry which, as outlined in the May 21, 2021 CTV News post, “Hair salons frustrated over reopening snub,” are mostly up in arms over the provincial governments decision to only allow then to reopen in phase two of the three step reopening protocols.

That won’t be before July at the earliest and will drive more and more hair salons into bankruptcy.

Schools aren’t included in the first wave of Covid-19 re-openings either.

As noted in the May 20, 2021 *Toronto Star* post, “Ontario schools could reopen in June with a ‘manageable’ increase in new COVID-19 cases, experts say,” no firm plans are yet in place although it could happen soon, maybe (or maybe not).

This ongoing uncertainty over ongoing government funded schooling has increasingly frayed the nerves of parents

and put an entire generation of students at risk of falling behind the educational levels of previous generations.

As noted in the May 21, 2021 Global News post, “COVID-19: Ontario faces pushback for lack of clarity on school reopening,” Ontario’s government is facing “criticism from doctors and teachers alike for failing to say if and when classrooms will reopen this school year.”

The article quoted Harvey Bischof, the president of the Ontario Secondary School Teachers’ Federation (OSSTF) as stating that “he’d like to see the criteria the province is using to decide whether it’s safe for schools to reopen.”

Are we under ‘mind control’?

Continued from p. 8

these laws are made to protect them. They blame us, the citizens, for all of Earth’s destruction by telling us that it is we who have demanded their products. They intentionally flaunt us with their advertisements convincing us that we demand their supplies. And we fall for it...we buy it. They laugh really hard at this. They have secrets stockpiled in the earth, bounties and safety measures for themselves, but not for us. We citizens here on the other side don’t have the same things. If we dare complain they create “special” circumstances so that we will fight amongst ourselves. They observe us fighting and they laugh at this. And then they blame us for any disastrous outcome. They step in to control us when we get out of hand. It’s a game to them. They need something to do and so they tease us. They create a money system. They tell us how much we can earn before they take most of it from us. They fill their coffers with our dollars. They laugh at us for this because they know that we have no power to fight them. They know that we will complain perhaps just a little, but then we will simply carry on as their slaves. They lead us to believe that we are free. They lead us to believe that our best interest is in their hands. They laugh because we let them lead us. They laugh because they set up our system to be dependent upon them and we fall for it. We give them their power each and every day. They keep changing the laws and the rules ever so subtly and we keep obeying. Their laws and rules are almost impossible to challenge. We can no longer think for ourselves. They know this and they laugh at their brilliance. They believe their plan is working and they have much more in store for us. They laugh because they think they now control the cosmos. They laugh because they know they keep cosmic secrets to themselves. They tell us little, or nothing at all about their discoveries. They no longer care about the Earth for they now have their sights set on the entire Universe. They are becoming higher and higher on their plateau, the platform they originally had planned...the one we helped them build. And we the citizens are sinking down lower and lower into the abyss. We can no longer see. Our light is slowly diminishing. And because we are not dead yet, because we are still hard to kill, they infect us with fear. They infect us with a virus. They laugh when we hide from the disease...when we hide from our own families. They laugh when they take away our jobs. They laugh because we have become dependent upon them for our livelihood. We think we need them to tell us what to do. They, on the other side of the dark glass wall, laugh a most sinister laugh. Can you hear it? They

and other sanctions, but the mechanisms for enforcement are spotty, open to interpretation, sometimes undefined and often confusing.

As noted in the May 17, 2021 Freedom Forum News post, “Ontarians No Longer Listening to the Government or Social Distancing Pronouncements,” this situation has been slowly building for some time.

Some business sectors have also become more brazen at publicly objecting to the reopening protocols outlined by the Ontario government by arguing that they are arbitrary, unsupported by any independently verifiable science of medical studies and illegal under civil rights and

laugh so hard because they think we can do nothing to stop them. They think we are too afraid and too dumb to do anything. They have deliberately made us sick. They make us believe that we will all eventually become sicker. They create an injection; a vaccine they tell us will save us. They enforce more poison upon us. Their egos boast at the creation of this...their newest and perhaps final weapon. They know we will accept their injection for fear of our own lives. And we do ...most of us. They know we will behave like sheep, led by their command, and run to them to be poisoned. They know they own the means to shut us down, to close our communications, to stop us from fighting back or from talking to each other. They are close to killing us. They think we no longer have any power to fight back or intelligence to care. They continue to watch us to see what we will do, to see how we will react. They know that whenever they implant an idea, whether good or bad, we the citizens will put their idea to action all on our own. They watch from behind their dark wall as we obediently march on completing their sinister deeds for them. They laugh so hard at this...at how easy it is to manipulate us. They see that we are a disconnected species. And now, to finish their plan, they need just a little more time. They need more time to enforce their greatest and final chaos upon the citizens of Earth in order to bring us completely down. They plan to reset our planet and to eliminate most of us. And we the citizens have unconsciously aided them since the beginning of time. But *TIME* is ticking...*TICK-TOCK...TICK-TOCK...TICK-TOCK!*

At this moment in history the cosmic clock has made its final gong! A galactic resonance has signaled a mass planetary awakening, a consciousness revolution...the un-hacking of the human mind. The galactic timer sounds its urgent momentum creating a vibration that will not be stopped. Time is slowly shifting allowing the other side to rise up in Light. Those awakened and who seek justice will lead the citizens to truth. They are realizing they have the ability to quench the darkness that currently hovers over this sovereign planet. They know that cosmic help is here. Soon the wall will crumble and Light will replace the darkness. But the Light may be unfamiliar to some, for it will shine from the inside out. This new Light, if allowed, will expand the innate abilities each human naturally possesses. It will bring to life a new way of existing that has not been understood before. The galactic plan is that “they” will no longer rule “us.” But can the citizens shine enough inner light to do this? Only time will tell. *Listen... can you still hear the laughter?*

Nothing Will Stop The Faithful

Continued from p. 3

elicits thousands of Canadians to stand up for their rights as well.

Just days after the Aylmer Police and the courts order his church to closed, Pastor Hildebrandt held an outdoor service with several hundred people showing up in support. As Hildebrandt spoke this past Sunday, the message was clear – the church will never be ‘closed,’ the church is the people and you cannot silence the people. He talked about how the development of Canada included the right of religion and its fundamental providence in the day-to-day lives of Canadians and Canadian Law.

The congregation and visitors alike shared in fellowship with a short but powerful message of hope and unity followed by a lunch prepared by the congregation. During the picnic of a few hundred, people were hugging, shaking hands, praying together, and meeting friends, new and old alike and everyone there smiled and spoke with glee.

Pastor Henry Hildebrandt will continue to defy the brown shirts of public health officials despite the thousands of dollars in fines and court-ordered repayment of the health official’s legal costs as he, as do thousands of others, believes that Canadians need to have their rights protected and not infringed upon. Pastor Hildebrandt is the leader of the little church that could and will continue to do so.

“**he church will never be ‘closed’, the church is the people and you cannot silence the people.**”

Schooled To Be Locked Down

By Ken Lori

Among all things COVID most puzzling has been our acceptance of measures given the statistics. As of May 2, 2021:
37,742,154 Population
24,383 deaths by COVID
0.064% of Canadians dead by COVID which begs such questions:

1. Why do we listen to government but not the numbers?
2. Why are we afraid of questioning the measures?
3. Why is there no discussion comparing COVID and lockdown victims?
4. Why can't we problem-solve collectively?
5. Why can't we recognize censorship?
6. Why are we so eager to be vaccinated?
7. Why can't we think?

Indeed, why?

Q. Why do the majority allow and believe in such measures or don't believe in them but refuse to speak?

A. School. Yes, the answer to all of the above is school, each of us by law socialized twelve years not to question the curriculum. School is no doubt the answer – not to the question of what society needs more but to the question of why we respond to un-debated mandates with such trust, obedience and docility.

Consider school: five days a week for ten months a year over twelve critical years children at their most impressionable conform to the body politic in semi-detached rows and columns strictly conditioned by rules, norms and values. It's not so much brainwashing as it is identity-washing with little room for thought, discussion or bonding which, incidentally, are why bullying and peer pressure prevail in the classroom.

School is no doubt the Valium of the masses altering states of mind and nation while avoiding the cultivation of consciousness or scruples. Examination of moral, social and/or biological dilemmas are not on the menu nor are community building, real world problem-solving or thought.

Q. What's the most dominant institution over the way we think, behave and respond to government?

A. School (i.e. government) where you:

1. Don't question authority (government)
2. Don't talk to your neighbor
3. Behave, be quiet and follow the leader (government)
4. Read (what government decides)
5. Work alone
6. Copy (what government speaks)
7. Memorize (what government writes)
8. Answer the question (that government asks)
9. Study for the test (conducted by government)
10. Live at the mercy of your environment (influenced heavily by government)

...eerily similar to our existence in lockdown.

For those not academically or socially gifted school experience includes:

1. Feeling stupid
2. Feeling inferior
3. Alienation and exclusion
4. Resentment, anger, frustration, hostility (taken out on peers)

How To Protect Your Child(ren) From School Boards In Canada

By Jenny Bedford

Parents all across Canada are getting ticked off at just how many decisions are being made without them regarding their own children. With all the extreme measures being put in place to keep our children 'safe' it is becoming painfully clear that the government, school boards & other public service organizations are going way too far and are not considering the greater consequences to our children and to Canada overall.

Canadians are quickly stepping up to stop this insanity and protect their children from the harmful effects of short sighted decisions being made by bureaucrats. The below "Notice Of Liability" was written by volunteer lawyers (Lawyers4Truth.ca) to provide parents with a way to claim their rights and hold school officials accountable for their actions and for any harm done to their children.

The form on this page is an example notice for the province of Ontario. This notice is available for every province in and territory in Canada. To get a downloadable, printable version visit: <https://lawyers4truth.ca/school-information>

5. Need for escape/release (through alcohol, drugs, cutting, excessive eating or dieting)
6. Need for acceptance (through gangs, cults, "bad" influences)
7. Need for positive attention and/or love (through social media)
8. Need for mood enhancement (through therapists, medications, formal groups)
9. Need for opportunity for active (v. passive) involvement in community, to have purpose
10. Desperate need to avoid suffering and fit in

...which is why our neurotic approval-obsessed national community conforms and complies without question. It's also why so many are not self-confident, visionary, free thinking, research-prone, progressive or united through mature exchange.

Again notice life as an outsider at school and in lockdown, neither life scientifically proven to be healthy. There are no studies that demonstrate school's positive impact on mental, emotional, social and spiritual health nor, incidentally, are there studies of those in lockdown. Neither have been proven to be good for us, neither accepted voluntarily, both imposed under threat.

Naturally a society socialized by school to believe in its objectives would be hard pressed to notice its spiritual suicide (every desk an electric chair) or its erasure of mind and individuality. After all school is society's sacred cow, the forced experience for everyone yet never fingered as the culprit of mass psychology much less personality destruction.

At present, like school, government drags us lock-step before authority figures, their agendas explicit and relentless: respect restrictions, not each other; answer questions rather than question answers; listen to the critical leader, not the critical mind; ingest information rather than cultivate knowledge; and worship the system rather than seek out the truth.

Q. What is the truth?

A. 0.064% of Canadians dead by COVID over sixteen months.

Should the educated (read: indoctrinated and undermined) question the statistics they are not only enemies of mine but mind, truth and freedom – in short, the very embodiment and product of school. If you really think you can catch COVID-19 alone in your vehicle I suggest you follow the mind-washing trail back to childhood.

In the end (figuratively and literally) we have locked down and welcome the vaccine as instructed: without question, thought, discussion or love.

NOTICE TO SUPERINTENDENT OF SCHOOL BOARD

(Province of Ontario)

Child Full Legal Name:

Legal Parent(s)/Guardian(s) Name:

Grade Child Presently Attends:

Name of School:

School District Number & Name:

LEGAL RIGHTS OF MY CHILD

IT IS THE RIGHT OF EACH CHILD to receive an education if such Child is between the ages of 6 and 18 and is resident in the Province of Ontario.
IT IS THE RIGHT OF EACH INDIVIDUAL, as a fundamental principle and as a matter of public policy and human rights, to be treated equally regarding dignity, rights and responsibilities, without regard for race, religious beliefs, colour, gender, gender identity, gender expression, physical disability, mental disability, age, ancestry, place of origin, marital status, source of income, family status or sexual orientation.
IT IS THE RIGHT OF EACH INDIVIDUAL to Life, Liberty and Security of the Person as protected by section 7 of the *Canadian Charter of Rights and Freedoms*.

FORMAL NOTICE OF NON-CONSENT & EXEMPTION

As the Legal Parent/Guardian of my Child, this letter represents FORMAL NOTICE that my Child is EXEMPT from any requirements to wear any type of face-covering. It is my expectation that my Child will not be segregated, placed behind barriers, isolated or otherwise discriminated against. I expressly do not provide my consent for my Child to receive any medical procedures related to COVID-19, including but not limited to any liquid hand sanitizer, testing, collection of bodily fluids, medication, treatment or injection that interferes with, impacts, impairs, affects or obstructs the autonomy of my Child's physical person. This Notice revokes and supersedes any previous consents, implied or express, provided on behalf of my Child in relation to any form or manner of treatment and is only for the purpose of Covid-19.

PROTECTION OF THE LEGAL RIGHTS OF MY CHILD

Failure to comply with this Notice constitutes willful breach of the legal rights of my Child in Canadian Law that is punishable in accordance with the provisions of such laws. Such laws include but are not limited to the following: *Education Act*, RSO 1990, c.E-2; (Ontario) *Human Rights Code*, RSO 1990, c.H.19; *The People's Health Care Act*, RSO 2019, c.5-Bill 74; *Criminal Code*, RSC 1985, c.C-46; *Canadian Bill of Rights*, SC 1960, c.44; *Canadian Charter of Rights and Freedoms*, Schedule B to the *Canada Act* 1982 (UK), 1982, c.11.
*Note: The rights conferred by these laws ARE NOT superseded by Administrative Policy or Regulation.

By execution of this document, I HEREBY CONFIRM THAT: I am the Legal Parent/Guardian of the Child identified above, I have the proper legal authority to undertake the decisions described in this Notice on behalf of the Child and I understand and authorize the statements in this Notice of my own free will and in consideration for the best interests of my Child, including the Child's physical, psychological and emotional safety, and the Child's needs and circumstances.

SIGNED this ___ day of _____ 2021.

Educators For Human Rights: #ProFreedom #ProHealth

Educators For Human Rights (EFHR) is a growing group of educators from across Ontario, who have come together to raise concerns about the harms of the measures imposed in our schools, and the infringement on basic human rights. As current and retired educators, our mission is to:

- Uphold our duty of care and protect the inherent human rights of students, families, and educators.
- Defend the right of every child to quality in-person public education, free from all forms of discrimination.
- Put students first. Lockdowns, school closures, mask mandates, physical distancing, chemical sanitizers and messages of fear harm children.
- Let children be children in a safe and inclusive environment that balances their physical and mental health.
- Respect each individual's bodily integrity and freedom of choice when it comes to health and medical intervention.

On May 6, EFHR representatives participated in a press conference at which constitutional lawyer Rocco Galati publicly announced his upcoming legal action defending the rights of children, and challenging the constitutionality of the draconian measures in schools. A Notice of Application was filed on April 20, 2021, against the government of Ontario and various school boards and public health officers. If the application is successful, any order the court gives would apply across

the province. EFHR are named as joint applicants in the case, along with Children's Health Defense Canada and 18 children (represented by their litigation guardians). The Notice of Application can be viewed on the ConstitutionalRightsCentre.ca website, where donations in support of the legal fund can be made by clicking on the SCHOOL ACTION button.

Two days later, on May 8, EFHR held a peaceful assembly on the lawn of Queen's Park in Toronto. Hundreds gathered to hear speeches from teachers, parents and students. In addition, representatives from Global Frontline Nurses, Police on Guard for Thee, Save Our Youth, as well as an Ontario pastor, all attended and spoke about the impact the current situation is having on our children. Thank you to all those who came out to support that day, or who viewed the livestream.

Similar groups of educators are organizing and mobilizing in other

provinces as well. EFHR has been coordinating with leadership from BC Educators For Human Rights to share strategy, resources and messaging as they build their platforms and grow their membership. It is often said that with rights, comes responsibility. As educators, we believe that protecting human rights IS our responsibility.

Follow Educators For Human Rights on Facebook, Instagram and Twitter. If you are an Ontario educator who aligns with our mission, please reach out to EducatorsForHumanRights@protonmail.com.

A Doctor's perspective on Covid

Continued from p.1

to censor and deceive us all; it's genuine propaganda.

Regarding the Use of Face Masks:

The forced wearing of masks by most of the world's population is not unanimously supported by real science. These masks cause significant harm to our psychological, social, dermatologic, dental, systemic and otolaryngotic health. Though I generally have great health, the masks have given me rashes and nasal symptoms whenever I have had to wear them for prolonged periods, which resolve whenever I do not wear them for a few days. What I find most disturbing is the elimination of facial expressions, and hence normal visual social interaction.

Regarding Covid-19 Vaccinations:

The history of past attempts at vaccines for coronaviruses, revealed some very dangerous side effects in animal models, and the efforts were abandoned. Why would we take a dangerous vaccine for a generally mild illness, to which we develop herd immunity anyway? The current roll-out of fast tracked expensive experimental "vaccines" is burying the taxpayers in endless debt to the rich and powerful villains of this story. Yet, we the people who have been imprisoned and abused in this scandal, are being manipulated into taking strange new injections, in hopes that we might regain some of our freedom. Additionally, most of the so called "vaccines" are not vaccines (unless we change the definition of vaccines). Rather they are injections of Corona virus genes. See the video on this site entitled: This Is Not A Vaccine. (<https://drtrozzi.com/2021/01/this-is-not-a-vaccine/>)

More Scientific Study

In 2021, I continue in devote time to the study of coronavirus medical science, and geopolitics.

Ivermectin has come to light as an extremely effective

safe prevention, prophylaxis, and treatment for covid; yet it has been suppressed by business and political interests, while very expensive and unlawful injections of the masses are under way. Big Pharma and their political consorts are pushing to administer these experimental injections into the world's population, even infants and children. In reality, the SARS-CoV2 poses very little threat to almost everyone but the very vulnerable persons who are similarly vulnerable to many viruses and other illnesses.

Children have zero risk of death from covid-19 but are being severely damaged by the lockdowns, facial barriers ("masks"), isolation, and denial of many essential elements of childhood. Similarly, almost everyone but the very old or ill, have almost no risk of death or serious injury from coronavirus infection.

It is strongly my diligently researched conclusion that I do not want, nor do I recommend the experimental injections for the vast majority of people. Similarly, I do not support many measures like the "case" count generating PCR "test", lockdowns, and forced wearing of harmful facial barriers.

Big Pharma is promoting the idea that new variants of SARS-CoV2 will require injections for immunity updates, as well as more fear and lockdowns. However, the most distant variant currently is 99.7% genetically identical to SARS-CoV2. SARS-CoV1 and SARS-CoV2 are only 80% genetically identical, yet we now know that exposure to SARS-CoV1 17 years ago, made people persistently immune to many coronavirus's including SARS-CoV2 to this day. As experts like Dr Michael Yeadon explain, this makes it virtually impossible that immunity to SARS-CoV2 will not work for one of these subtle variants.

Research within the last year shows that many people, likely well above 50% are immune to SARS-CoV2 without any experimental injection. They are immune due to prior SARS-CoV1 exposure; or exposure to SARS-CoV2 in the past year and a half. Further, SARS-CoV2 is a very mild or asymptomatic experience for about 80% of peo-

ple, and only a very small percent, less than 0.1 %, are at serious risk from this cold.

Pushing experimental injections on the masses as is currently happening, severely violates the Nuremberg Code for medical experimentation. Many covid protocols are likewise crimes against humanity in violation of the Nuremberg Code, and other legal standards such as civil liberties.

Personal Decisions

To honor the Golden Rule and the Hippocratic Oath, while obeying the Nuremberg Code, I continue committed to my responsibility as a physician, to research thoroughly and share my insights honestly. In the current situation, this requires that I surrender my income, and yet commit my time, energy, and resources to this important work.

I have resigned all my hospital positions thus forfeiting my entire income. I have sold my house and greatly downscaled my family's standard of living, while surviving on limited savings, and committed myself to do my part to help counter the criminal covid enterprise.

I pray that I may help contribute to an outcome that is true and just, and the return of our free society, and civil liberties. I believe that we are almost all victims in this, regardless of where we are on the path for the recovery of truth.

I am grateful to everyone else doing your part in this fight, and for all forms of support from prayer, to sharing our articles and videos, as well as financial donations.

We have also included some very relaxing music on our site which can be enjoyed for free or purchased to also help support the work we are doing.

Sincere blessings,
Dr. Mark Trozzi.

Thank you. I love you. Keep on passing it on."
- Shawn Jason*

Absurdity Observer

A List Of Some Of The Most Absurd Things That Have Happened In Recent Weeks

- **The Supreme Court of Nova Scotia** has issued an injunction that **bans any anti-lockdown protest** and allows police to arrest anyone that either participates in a protest or promotes a protest on social media. The ban came just in time for the “Worldwide Freedom Rally” that drew in tens-of-thousands of protesters across Canada, including an estimated 20k in Toronto.
- **Musician Eric Clapton blames propaganda for his disastrous COVID-19 vaccine experience.** Clapton experienced severe side effects for weeks after his first and particularly his 2nd shot of AstraZeneca’s COVID vaccine. “My hands and feet were either frozen, numb, or burning, and pretty much useless for two weeks, I feared I would never play again,” Clapton wrote in a letter posted to Telegram, “but the propaganda said the vaccine was safe for everyone.”
- **Despite only 1131 children receiving the shot during the trial, the Pfizer vaccine has now been approved** by the FDA’s “Emergency Use Authorization” and Health Canada’s “Interim Order Authorization” for children aged 12-15. The children’s dose is the same as the adult dose and a significant degree of adverse reactions were noted, including arm pain (90.5%), fatigue (77.5%), headache (75.5%), chills (49.2%), muscle pain (42.2%), fever (24.3%), and joint pain (20.2%). 4 children in the vaccine group developed a psychiatric disorder, compared to 0 in the control.
- Experts call out the CDC for making a huge exaggeration by claiming “**less than 10% of covid transmission occurs outdoors**” when their own data shows **the true number to be below 0.1%.** In fact, there is not a single documented COVID infection anywhere in the world from *casual* outdoor interactions (most outdoor transmission is reported by intimate workplace settings).
- “I want to show people there is no danger in getting vaccinated. On the contrary, it will protect us.” **-India’s Health Ambassador** and actor Vivekh declared on national TV as he took the COVID-19 vaccine. **He passed away 24-hours later of a blood clot.**
- In the city of Toronto and the Peel region of Ontario (and in Manitoba, BC, and Nova Scotia) **children aged 12 and up do not need parental consent to get the covid vaccine.** Select locations are also handing out incentives, such as ice cream at Nathan Phillips Square.
- Increasing rates of **gastroenteritis, particularly in children,** are being reported throughout the world and experts now suggest **the increased use of hand sanitizers may be responsible.** A roughly four-fold increase in Gastroenteritis has been observed in Australia, New Zealand, and Taiwan.

- Dr. Fauci, chief medical advisor to the White House, says **wearing masks could become a seasonal thing** after the pandemic to help avoid spreading or contracting respiratory illnesses like the flu.
- **UFOs are here! The Pentagon has confirmed more videos of UFO footage taken by the US Navy.** According to the Department of Defense, the newly leaked footage, and other videos from previous years, are part of an ongoing investigation since their activity has become “increasingly bold.” As a former Navy Chief who witnessed the UFOs explained, the objects “**indicate a technology that outstrips our arsenal by at least 100 to 1000 years.**”

(Washington, DC), a Six Flags ticket (Illinois), and the city of Detroit is offering \$50 prepaid cards to people who take their neighbors to get a shot.

- **The World Economic Forum urged companies to fire unvaccinated employees** as part of “Jobs Reset.” The now deleted tweet by @WEF said “Get you COVID-19 jab or you could face consequences from your employer” and included an infographic stating that 56% of employers require some or all employees to be vaccinated.
- The Public Health Agency of **Canada has finally admitted we have a “residual positive” problem with the COVID-19 PCR test.** In the past, hundreds of travelers were unable to return to Canada due to continuously testing positive for weeks or even months after recovering from the virus. Canada’s new rule allows for positives to enter the country if they can prove that their first positive was between 14-90 days ago.

- **Saskatoon police aim to crackdown on pandemic restriction protests by outing attendees.** Saskatoon police recently released photos to the public in an effort to “help identify” people who protest COVID-19 public health measures.

- The Federal government is asking Canadians to take a “leap of faith” **that Bill C-10 won’t hurt free speech.** The bill, aimed at changing social network algorithms to favor Canadian government funded and approved media, is “**full of murky details**” and may result in newsfeeds that favor more “authoritative sources” according to experts.

- **Experts say CDC’s summer camp rules are “cruel” and “irrational.”** The CDC’s newly released guidance for summer camps include: masks must be worn at all times (even outdoors, even if vaccinated, for children as young as 2 -with only exceptions for swimming and eating where campers must be at least 6 feet apart). **Campers must remain at least 3 feet apart from each other at all times including, again, outdoors.** Campers should be cohorted and never mix. And art supplies, toys, books, and games are not to be shared.

ance for summer camps include: masks must be worn at all times (even outdoors, even if vaccinated, for children as young as 2 -with only exceptions for swimming and eating where campers must be at least 6 feet apart). **Campers must remain at least 3 feet apart from each other at all times including, again, outdoors.** Campers should be cohorted and never mix. And art supplies, toys, books, and games are not to be shared.

- **A Halifax man was charged for an “attempted hiking trip.”** RCMP charged the man \$2,422 for violating the Health Protection Act since he was conducting “non-essential travel.”

- **Dr. Anthony Fauci** (chief medical advisor to the US president and NIAID director) **perjured himself before congress.** His statement, “the NIH has not ever and does not now fund gain-of-function research in the Wuhan Institute of Virology” is simply not true. NIH’s funding to the Wuhan Institute of Virology is well documented on both the NIH RePORT site, and in the PNAS research article *SARS-like WIV1-CoV poised for human emergence.*

DRUTHERS IS 100% PEOPLE POWERED

DONORS

100% of donations are used to print and distribute this paper to concerned Canadians like yourself. If you believe in this mission, please donate what you can today.

Donate: donorbox.org/druthers
Etransfer: admin@druthers.net
Crypto: druthers.net/crypto

We printed 250,000 copies in June = 1,425,000 total since Dec., 2020!

SUBSCRIBERS

Get every issue of Canada’s most interesting newspaper delivered right to your door or to the door of a loved one each month. This is a powerful way to support the growth of Druthers.

Order: druthers.net/subscribe

Or get a one time delivery instead of a subscription by visiting: druthers.net/papers

VOLUNTEERS

Be part of this grass roots movement. Deliver papers. Write articles. Make videos. Report for Druthers. Something else perhaps? Promotions. Connections. Collab ideas. We would really love to hear from you.
